

PATIENT MODELS REQUIRED

Expressions of interest are sought from students willing to become patient models for medical students in years 1-3 of medicine. Students will be performing cardiac, respiratory, musculoskeletal, neurological and abdominal examinations. There are no invasive procedures involved.

Models will be paid \$15.00 per hour and sessions normally run for 2 hours in the clinical teaching rooms in the Old Biochemistry Building on Hackett Drive.

Models need to be of average height and weight. We request that male models wear shorts and a t-shirt and female models wear a bikini top and shorts.

Students will need to complete a tax form and a one off payment form giving their bank details and tax file number as they will be paid through the University's salary system.

International students should note that they must have a valid work permit/tax file number before participating in the sessions.

Interested students should contact Jane James by email at jane.james@uwa.edu.au for more information.
