

Graduate Engineers

EGS Survey is a specialist provider of Hydrographic, Geophysical, and Geotechnical Surveys.

Due to the continual expansion of our Australian operations we are seeking Graduate Engineers interested in a career as an Offshore Survey Engineer.

EGS Survey offers the opportunity to work with the best equipment and people. This position provides the opportunity to build substantial professional experience through a variety of challenging projects both in Australia and Internationally.

Essential Requirements:

- A commitment to safe work practices and adherence to the EGS Survey Safety Management System and policies.
- Formal degree qualifications in a relevant discipline or appropriate military or industrial training & experience.
- Excellent oral and written communication skills.

A very competitive remuneration package will be awarded to attract suitable candidates.

Please forward applications to Karl Perry at kperry@egssurvey.com.au
