

Want to work in a growing IT firm?

Work Available for students graduating or near the end of their degree

Finished uni? Finishing next year?

Snowden Technologies is looking for students and/or graduates

Applicants need to be **meticulous** in their work, **fast learners**, and **reliable**. Some knowledge of databases is recommended. Tool of preference being **Microsoft SQL Server 2000+**.

You will work on leading edge development projects with global perspectives and be exposed to the latest technology offerings taking advantage of Snowden's Gold partnership with Microsoft.

You will have experience in

- Microsoft SQL Server 2000
- Advanced T-SQL
- Stored Procedures and User Defined Functions
- Database design and optimisation
- Reporting Services (highly regarded)

In addition to these core skills, you will also have strong communication skills, be able to work both autonomously and within a small team environment.

You will be working along side experienced data management and software development technicians giving you the opportunity to learn new skills and improve employment prospects for the future.

The Technology Division provides information systems solutions to the mining industry. Its passion is looking at the information systems that mining professionals use and improving them to achieve outstanding results for its clients.

Send résumé's and cover letters asap to David Conti: dconti@snowden.com.au
Please also send through the latest copy of your results and grades for your uni study.
