TI-1797

Solar-powered desktop calculator—with an 8-digit adjustable-angle display.

TI-1797

A very portable, small but sturdy desktop—with a display that's definitely different.

You may like your lights bright, but if you're fighting their reflection in your readout . . . well, it can change your whole point of view. The TI-1797 offers a new perspective.

It has a *hinged* display. So you can adjust it yourself and get the glare out. And get the most comfortable viewing angle. All it takes is a little extra play in your display.

Of course, the TI-1797 really shines when it comes to portability—big keys and a roomy keyboard, yet small enough for you to tuck it away and take it along.

Automatic constant lets you speed through repetitive problems without reentering numbers.

A percent key shortens and simplifies percentage calculations—to help give you time to figure discounts or sales taxes before you buy.

There's a full-function, add-to or subtract-from memory—to help you remember numbers during long calculations.

Another pivotal point: Solar power means no batteries. Ever.

So if you've got a gleam in your eye at the thought of getting the glare out . . . go get a TI-1797.

Specifications

Display: Hinged 8-digit LCD.

Size: 6.1 × 3.9 × 0.5 inches
